

Anton Golub

FRONTEND DEVELOPER

React · TypeScript · 5+ years

site aholyb.github.io github [aholyb](https://github.com/aholyb) linkedin in/anton-holub telegram [@gggoluba](https://t.me/ggggoluba) email golubanton753@gmail.com

PROFILE

Frontend developer with more than five years of experience, currently building internal web applications for Alfa-Bank and mentoring interns at Aston. I work in React and TypeScript day to day, and I am comfortable reaching into the Node layer when a feature needs it.

What I care about: code that the next person can maintain, tests that catch real regressions rather than decorate the repository, and interfaces that stay responsive with a lot of data on screen.

STACK

Front-end	React · TypeScript · JavaScript · Next.js · Redux Toolkit · MobX · GraphQL · Vite
Testing	Jest · Vitest · Cypress · Testing Library · Nock
Styles	SCSS / SASS · CSS Modules · CSS-in-JS · MUI / Material UI · Bootstrap
Back-end	Node · Nest · PostgreSQL · MySQL · MongoDB

Feb 2024 –
present
current

Alfa-Bank

Frontend Developer · React · TypeScript

Internal web applications for bank employees.

RESPONSIBILITIES

- Building new features in React and TypeScript
- Refactoring legacy code for maintainability and performance
- Writing and maintaining automated tests
- Estimating tasks and taking part in sprint planning
- Working closely with backend developers and QA engineers
- Reviewing code and taking part in architectural discussions

ACHIEVEMENTS

- Sped up the application by finding and removing frontend bottlenecks
- Made releases safer by introducing automated testing
- Optimised several critical UI components for responsiveness

Apr 2023 –

current

Aston

Frontend Developer & Mentor · React · TypeScript

Commercial web development alongside mentoring in the developer internship programme.

RESPONSIBILITIES

- Running technical interviews for the internship programme
- Mentoring interns and junior developers
- Developing commercial web applications
- Preparing training materials and running sessions

Jan 2021 – Dec
2021
1 year

Sber

Frontend Developer · React · MobX

SberOffice — an internal booking system for Sberbank employees: workplaces, meeting rooms and schedules.

RESPONSIBILITIES

- Developing UI components and application modules
- Building features with React and MobX
- Performance optimisation and bug fixing
- Implementing responsive, user-friendly interfaces

ACHIEVEMENTS

- Improved UI performance by resolving rendering bottlenecks
- Optimised frontend logic for large data sets

May 2019 – Dec
2020
1 yr 8 mo

AskerWeb

Web Developer · JavaScript · PHP · WordPress

Websites of varying complexity in native JavaScript and PHP on the WordPress CMS.

RESPONSIBILITIES

- Markup and development of websites end to end
- Development in native JavaScript and PHP
- Building and customising WordPress themes

ACHIEVEMENTS

- Delivered and deployed complete sites for Levada, ArkMetall and ARMTEK, among others

Bank products are under NDA. These three are public:

Real estate	Levada levada-b-h.by Residential complex site: apartment picker by building, entrance and floor, 360° visualisation, prices and construction progress.
E-commerce	ARMTEK armtek.by Storefront of a large auto parts retailer: catalogue with lookup by car, personal garage, cart, pick-up points and delivery.
Catalogue	ArkMetall askerweb.by/portfolio/arkmetal Catalogue for a metal rolling supplier: rebar, sheets, welded mesh, pipes, beams and made-to-order metal structures.

PORTFOLIO

aholyb.github.io · github.com/aholyb

The site above is my own project: React 19, Vite, CSS Modules, bilingual, 58 unit tests and 21 Cypress scenarios, deployed by GitHub Actions. Source is open.
